KineticIT Prize

- $1,000 prize for Defensive Cybersecurity Unit
- Rules
  - One student with highest grade in CITS2006
  - If there are more than one students have the highest grade, then the **one student** with the highest WAM

Team

Garrison Gao
Unit coordinator
Room CS G.06
garrison.gao@uwa.edu.au

Jin Hong
Lecturer
Room CS1.10
jin.hong@uwa.edu.au

Larry Huynh
Senior Lab Facilitator

Ari Carter
Lab facilitator

Elliott Naidoo
Lab facilitator

James Caporn
Lab facilitator

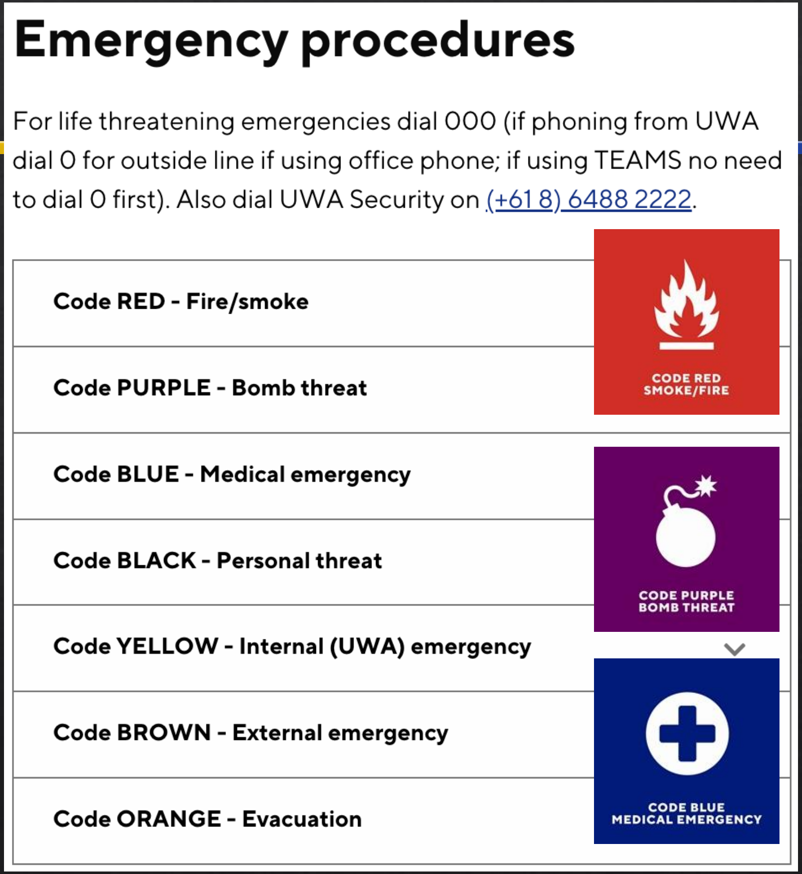
Robin Candy
Lab facilitator

Emergency

- General emergency: call campus security at 6488 2222 (or 1800 655 222)
- In super emergency: call emergency at 000

- In all buildings, we have an emergency procedure booklet that outlines how to react when such event happens.
  - Please take a time and read it.

- For more details, please have a read through our emergency procedure for various potential incidents
  - https://www.uwa.edu.au/about/campus-services/safety/hazards-incidents-and-emergencies/emergency-procedures



Emergency procedures

For life threatening emergencies dial 000 (if phoning from UWA dial 0 for outside line if using office phone; if using TEAMS no need to dial 0 first). Also dial UWA Security on (+61 8) 6488 2222.

- **Code RED - Fire/smoke**
- **Code PURPLE - Bomb threat**
- **Code BLUE - Medical emergency**
- **Code BLACK - Personal threat**
- **Code YELLOW - Internal (UWA) emergency**
- **Code BROWN - External emergency**
- **Code ORANGE - Evacuation**

Location

- Lecture
  - Venue: Austin Lecture Theatre (ARTS 159)
  - Time: Mondays 12pm – 2pm
- Labs
  - Lab 1: CSSE G09 @ Mondays 2pm – 4pm
  - Lab 2: CSSE G09 @ Tuesdays 11am – 1pm
  - Lab 3: CSSE G09 @ Tuesdays 4pm – 6pm
  - Lab 4: CSSE G09 @ Thursdays 10am – 12pm
- Consultation
  - Office at Computer Science building – email to book a time with Garrison or Jin

Changes will be announced (if any)

Schedule overview: Term 1

Labs start first week!

Week	Lecture	Lab	Assessments
1	Intro + Defence overview	Lab 0: Linux and Networking	Portfolio out Project out
2	Cryptography*	Lab 1: Hashing and Blockchain	
3	Privacy	Lab 2: Privacy	
4	Access Control	Lab 3: Access Control	
5	Security Management	Lab Quiz 1 demo	Lab Quiz 1
6	Security Tools	Lab 4: Vulnerability Analysis	Portfolio part 1 due

*Cryptography lecture will be available online due to Labour Day public holiday on Monday

Schedule overview: Term 2

Week	Lecture	Lab	Assessments
Break			
7	IDS	Project T1 demo	Project T1 due
8	Security Modelling and Analysis	Lab 5: IDS	
9	Proactive Cybersecurity	Lab 6: Risk Analysis	
10	Threat Intelligence	Lab Quiz 2	
11	AI and Security	Lab Quiz 2 Demo	Project T2 due
12	Special Topic	Project demo	Portfolio part 2 due

Assessments

Assessment Item	When	Covers	Worth (total)
Lab Quizzes	Weeks 5, 10	Topics up to the week	40% (20% each)
Project	Weeks 7 (Task 1) Week 11 (Task 2)	Various	40%
Portfolio	Week 6 (Part 1) Week 12 (Part 2)	Various	20%

Please note, all dates are tentative and subject to change!

How does the lab quiz work?

- During your scheduled lab time, you will be supervised by a lab facilitator to complete a timed lab quiz (~60 mins but can vary).
- You cannot receive mark if your attendance is not confirmed by the lab facilitator.
  - i.e., you must be supervised/invigilated by the lab facilitator to receive marks.
  - Attendance is required for all F2F students (unless a reasonable excuse is provided).

How does the lab quiz work?

- We will be using a peer-marking system, where you will be formed into a group of 4.
- Marking keys will be provided.
- For Demo, you will be given 10~15 min slots to complete the demo.
- Marking keys will be provided for peer markers to use and submit the report.
- The peer markers will also provide feedback to the demonstrator including the mark range.
- Facilitators will be available for any moderations and review of the peer marking process.
- All submitted peer marks will be reviewed and moderated by the teaching staff, and finalised marks will be released to students.

Project

- You will form a group
- Part 1 (20%) : Security issues in the community (research)
- Part 2 (30%) : Enhancing security in the community (implementation)
- Part 3 (20%) : Demonstration and highlight video (communication)
- Part 4 (30%) : Individual contributions
- You will submit a final report as well as doing Demo as required. All members are expected to be present at the demo and participate.

- TBC, details may be adjusted.

Portfolio

- You are given a list of tasks to complete over the semester.
- Keep track of your activities and completed tasks to create a portfolio.
- Submit the portfolio in week 6 and in week 12.
  - There will be a set of tasks (easier ones) to be completed by the week 6 submission.
  - The remaining tasks (harder ones) are to be submitted by the week 12 submission.
  - You can start early on all tasks regardless of the deadline.

Prerequisites and recommendations

- Prerequisites: CITS1003 and CITS1401 (or their equivalents)
- You will need to be familiar with Linux
- You will also need to study a bit about basic computer networking
  - Lab 0 will cover Linux and basic networking so don't panic.
- You may also use other programming languages other than Python as necessary.
  - But we'll keep this to minimal.
- You should also be familiar with basic discrete mathematics and number theory.

Please note

- Lectures provide **theoretical** and **conceptual** understandings of the topics presented
  - But we will also do some practicals in the lectures as applicable
  - So, you should bring your laptop if you want to try them in class as well
- Labs, portfolio tasks and the project provide **practical skills** of the topics presented
- The contents in Lectures, labs, portfolio tasks and the project will be related, but they are all **INDEPENDENT** learning materials
  - i.e., you will be learning new things in each lecture, lab, portfolio task and the project.
